BLUE Boxes indicate rules for processing. See next slide for details

XTEMP Rules

Rule 1 – The template displayed is based on the category selected and should match the profile provided by NAVICP.

The RICNOMENCLATURE is populated based on the category designation followed by the phrase "Temporary Assignment" with the following exception:

If the category selected is "Ordnance & Electronics", the RIC NOMENCLATURE will be based on the contents of the Equipment ID# field followed by the phrase "Temporary Assignment"

Rule 2 – The query compares the entered data on the XRIC Template screen with data contained in the RIC Nomenclature table. The query should exclude special characters (/,-,space, etc.)
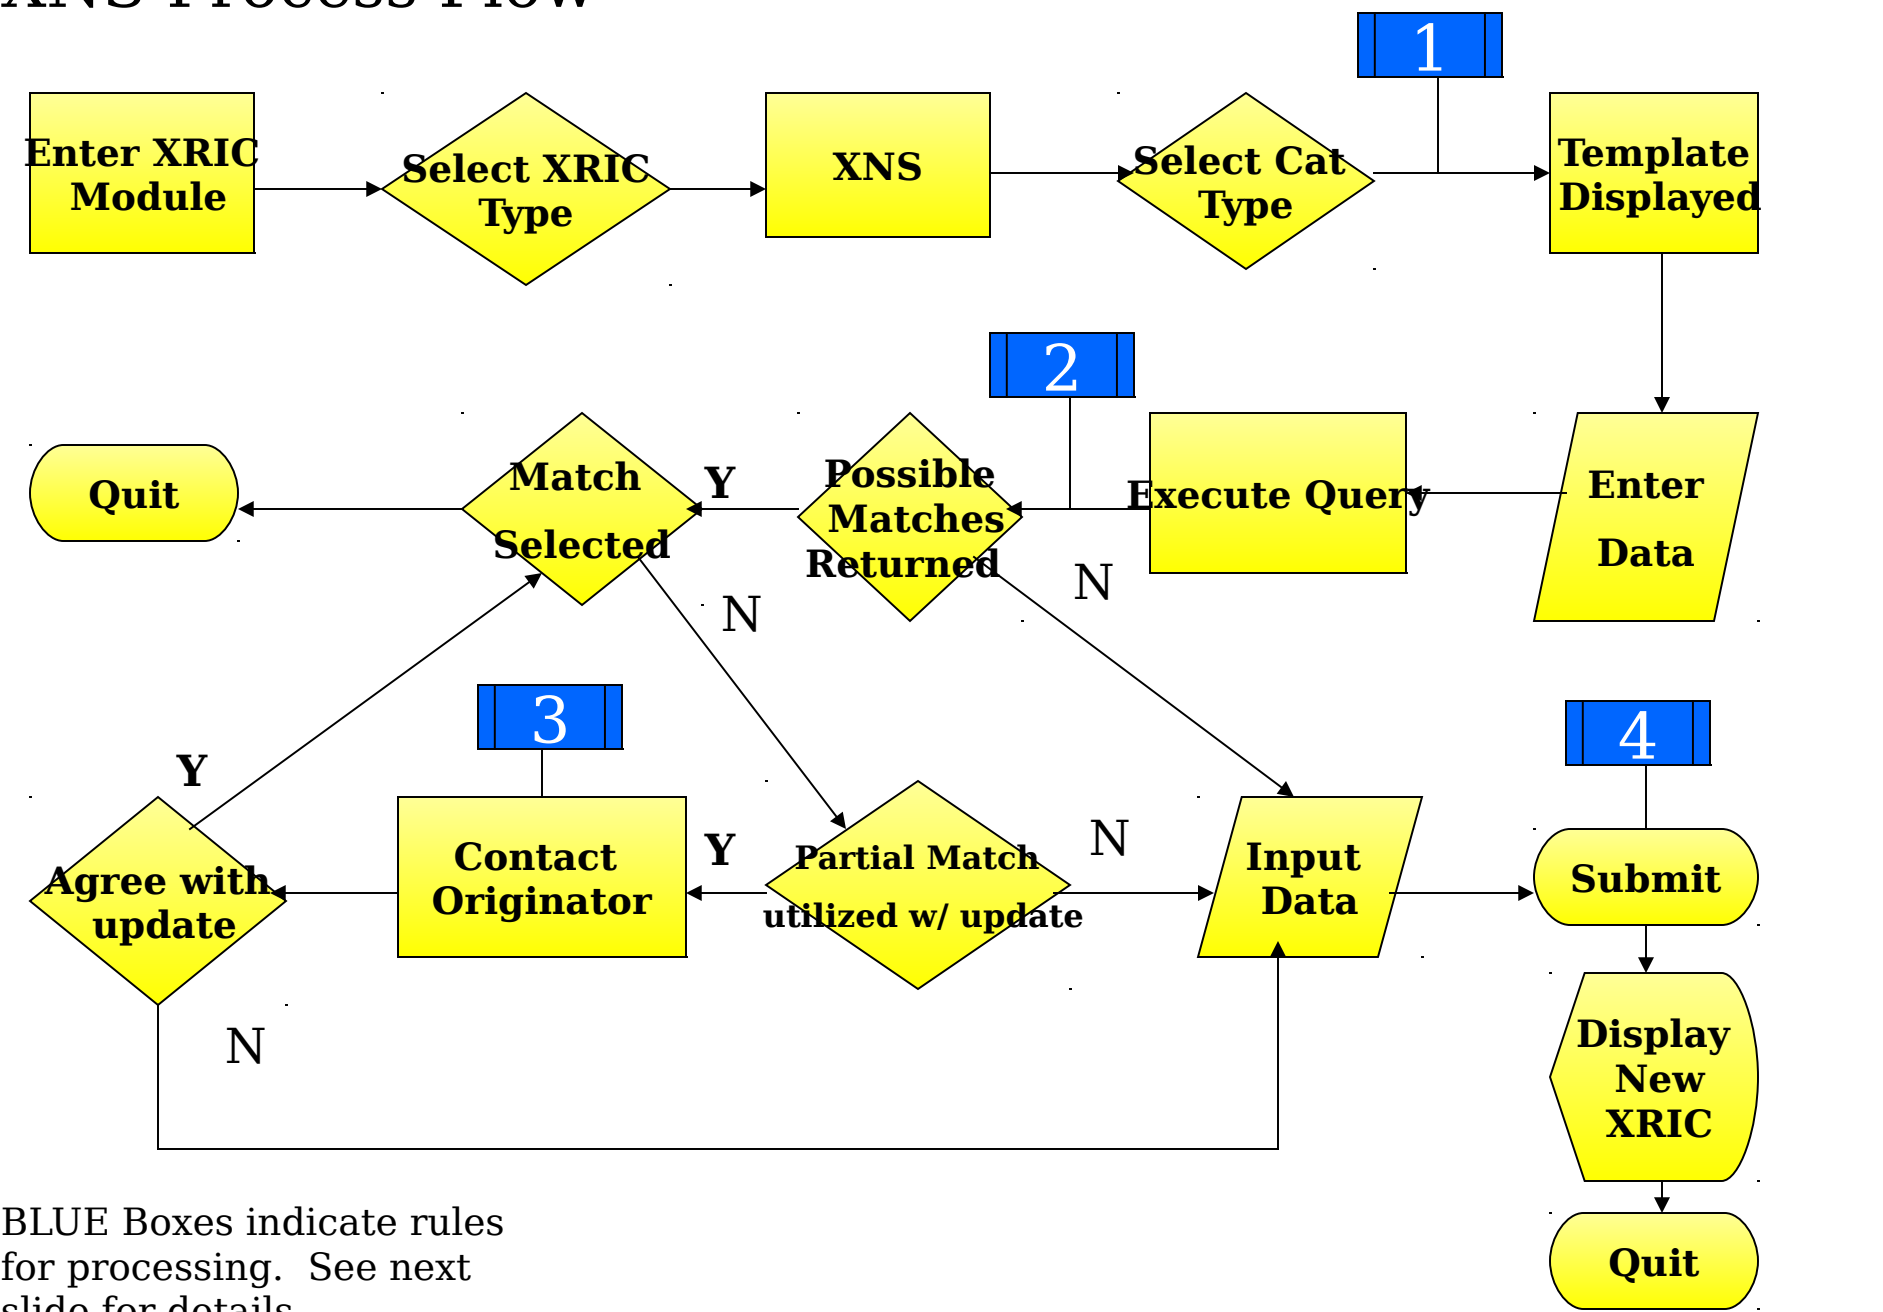

Rule 3 – If the technician wishes to contact the originator, upon selecting the appropriate button, a screen with the originator name, email, and phone etc. will be displayed. Additionally, the option to send an email directly to the originator is displayed.

Rule 4 – Upon selecting the submit button:

An edit check confirms that those items on the template designated as mandatory are populated.

The Type Indicator field will be populated with a value of "2" unless the category type is "Alteration item" in which case the Type Indicator will be populated with a "4".

XNS Process Flow
